**What happens
in the bath house...**

**doesn't necessarily stay
in the bath house.**

OK. So, bath houses aren't exactly for baths. But if you use Crystal Meth, you're putting yourself at risk for one, dirty existence. Tina is highly addictive and messes with your inhibitions making unprotected sex more attractive than the outcome. And having an STD like HIV for the rest of your life isn't exactly worth the splash. So, you may not be there for a bath. But you can still stay clean.

For more information about the effects and dangers of Crystal Meth, visit nothingpretty.org or call the treatment hotline at 888 736 0253.

There's **Nothing** Pretty about Tina.

NothingPretty.org is a program of the Midwest AIDS Prevention Project, supported by Arcus Foundation and the HOPE Fund.
